MATRIX

CHANGES EVERYTHING!

Featuring

Compact **R**ecurve **T**echnology

Compact Recurve Technology

Introducing the new Excalibur Matrix, the first compact recurve crossbow. Until now, recurve crossbows were notably wider than other crossbows. That gap has closed considerably!

But that's not all! With Compact Recurve Technology, the all-new Excalibur Matrix also brings dramatic and revolutionary enhancements in performance across the board!

Matrix is narrower. By six inches!

Matrix is shorter. By four inches!

Matrix is faster. Try 380 fps!

Matrix is more powerful.

It delivers 112.3 lbs of kinetic energy!

Matrix offers longer limb life. 60% longer!

Matrix is better balanced.

Matrix is lighter. A full pound lighter!

Matrix is more accurate.

Matrix is quieter.

Matrix can't be dry-fired thanks to Guardian™ Anti-Dry-Fire Technology!

Matrix is easier to cock. 5% less effort is required vs. 225 lb. models.

Matrix is superior in every way.

Matrix changes everything!

MATRIX CHANGES EVERYTHING!

Being more reliable, more accurate, more powerful, lighter weight, faster and virtually maintenance free wasn't enough. So we changed everything. And made the new Excalibur Matrix superior in every way!

Dramatically faster but with less effort

Efficiency is performance relative to effort. In this case, speed vs. effort required to cock. Thanks to Excalibur's exclusive Finite Element Analysis, state-of-the-art structural software that allows Excalibur engineers to duplicate real life loads and constraints, Matrix gives you unheard of speed (380 fps!) while requiring less effort to cock than previous models. This is like gaining horsepower and getting better gas mileage. Amazing!

PowerLoad limbs give you 60% longer limb life

Testing shows that the new PowerLoad limbs on a Matrix are a remarkable 60% stronger than the limbs on other Excalibur crossbows which, in turn, are already more durable than the limbs on other crossbows.

Ergo-Grip stock offers better balance and more

Matrix is not only 6" narrower, its 4" shorter as well, in part thanks to the shorter Ergo-Grip stock which brings everything closer to you when you shoot resulting in a more balanced feel. The stock's lightweight ergonomic design features a thumbhole, a pistol grip, finger guards on the forend and warm, soft non-slip rubber grip inserts.

A full pound lighter

The Matrix 380 Xtra is a full pound lighter than the Excalibur Equinox. You'll be amazed at how light it really is, especially given the speed and how quietly it shoots!

Improved geometry

Improved geometry means reduced string friction and wear for increased speed and efficiency.

Quad-Loc riser offers four-sided limb containment which means improved consistency, accuracy

Matrix features a Quad-Loc riser design that contains each limb on four sides (vs. three previously) which means added consistency and accuracy.

Integrated R.E.D.S. Suppressors (Recoil Energy Dissipation System) reduce recoil, noise

Built-in, R.E.D.S. suppressors reduce vibration, noise and shock for a quieter, more comfortable shooting crossbow. And, the R.E.D.S. suppressor pads are removable and allow you to rotate or reposition, insuring longer pad and string life.

Matrix string reduces creep, increases speed

The super-premium Matrix string is made of BCY Dyna-Flight 97. It reduces creep while increasing speed.

Guardian™ Anti-Dry-Fire system

The self contained Guardian™ system, housed in the scope mount, catches the string preventing the crossbow from firing if triggered without an arrow in place. A built-in release allows you to easily de-cock so you do not have to fire an arrow at the end of the day.

**Matrix is more compact.
Narrower by six inches,
Shorter by four inches!**

Compact **R**ecurve **T**echnology

MATRIX
380 Xtra

EXCALIBUR
CROSSBOW

THE NEW EXCALIBUR **MATRIX 380 XTRA** CROSSBOW, WITH COMPACT RECURVE TECHNOLOGY, CHANGES EVERYTHING!

Compact Recurve Technology

– six inches narrower, four inches shorter, a full pound lighter!

PowerLoad limbs – an amazing 60% stronger than the already most-durable-limbs-made on other Excalibur crossbows

Quad-Loc riser – contains each limb on all four sides (vs. three) for added consistency, accuracy

Ergo-Grip stock – brings everything closer to you when you shoot for better balance; thumbhole design, pistol grip, finger guards on forend, warm/soft non-slip rubber grip inserts

Guardian™ Anti-Dry-Fire System – housed in scope mount, it catches the string preventing it from firing if triggered without an arrow in place

Recoil Energy Dissipation System (R.E.D.S.) – integrated R.E.D.S. string suppressors reduce shock, vibration and noise

Matrix string – reduces creep, increases speed; made of premium BCY Dyna-Flight 97; proprietary center serving for increased string life

New!

Tact-Zone scope – Compact design with updated reticle, a 30mm tube, red/green rheostat illumination and multi-coated lens for exceptional clarity; adjustable for speed between 275 fps and 410 fps with half-inch click adjustments (at 20 yards) for easy sighting in

Four-arrow quiver (with bracket) – designed specifically for Excalibur crossbows for optimal convenience and arrow protection

Diablo arrows – made specifically for Matrix crossbows, these 18" (2" vanes) arrows are spined for blistering speeds and feature front-of-center weight for unparalleled accuracy and incorporates flatback inserts (no nocks) for more reliable string contact

Realtree Xtra® – applied to crossbow via "Kolorfusion" process which assures realistic detail and extreme long-lasting durability

MATRIX 380 Xtra

Introducing the new **Matrix 380 Xtra**, the top-of-the-line compact recurve crossbow from **Excalibur**! First and foremost, the **Matrix 380 Xtra** is fast (380 fps) and powerful (112.3 lbs of kinetic energy). But, that's not all. This speed and power is coming from a far more compact crossbow. Compared to Equinox, it's a full six inches narrower, four inches shorter.

Matrix 380 Xtra is also far more durable (60% longer limb life), lighter weight, more accurate, quieter, better balanced and easier to cock!

Matrix 380 Xtra features a self contained Guardian™ Anti-Dry-Fire system, housed in the scope mount, it catches the string preventing the crossbow from firing if triggered without an arrow in place. A built-in release allows you to easily de-cock so you do not have to fire an arrow at the end of the day.

Finally, the **Matrix 380 Xtra** is dressed to kill in Realtree Xtra® camo that is applied to the crossbow via the "Kolorfusion" process which assures extreme and realistic detail and long lasting finish. And it's outfitted with a Tact-Zone Scope (with 30mm rings), a cheekpiece, R.E.D.S. suppressors, a four-arrow quiver (with bracket), four Diablo arrows, four 150 grain field points and a rope cocking aid.

#3800 Matrix 380 Xtra Tact-Zone "LITE-STUFF" package

260 lb. 380 FPS⁺
13.12" Power Stroke

Velocity @ 350 Grain – 380 FPS⁺ | Draw Weight – 260 lbs | Power Stroke – 13.12" | Mass Weight – 5.9 lbs
Overall Length – 35.62" | Arrow Length – 18" | Arrow Weight – 350 Grain Min. | Finish – Realtree Xtra®
Stock Style – Ergo-Grip | Brace Height – .5" | Width "Un-cocked" – 30.62" | Width "Cocked" – 25.75"
Efficiency – 76.40% | String – BCY Dyna-Flight 97

THE NEW EXCALIBUR **MATRIX 380 BLACKOUT**, WITH COMPACT RECURVE TECHNOLOGY, GIVES YOU GAME-CHANGING PERFORMANCE CLOAKED IN BLACK.

Compact **R**ecurve **T**echnology

- PowerLoad limbs
- Quad-Loc riser
- Ergo-Grip stock
- Guardian™ Anti-Dry-Fire System
- Recoil Energy Dissipation System (R.E.D.S.)
- Matrix string
- Tact-Zone scope (with 30 mm rings)
- Four-arrow quiver (with bracket)
- Four Diablo arrows (with 150 grain field points)
- Cheekpiece
- Rope cocking aid

New! **MATRIX 380 BLACKOUT**

The new **Excalibur Matrix 380 Blackout** is the compact recurve crossbow designed for those who hunt from a blind or prefer a tactical look. Other than its stealth-black appearance, which allows it to disappear in a blind, the Matrix 380 Blackout is identical to the Matrix 380 Xtra and offers identical speed (380 fps) and power (112.3 lbs of kinetic energy)!

You get the Guardian™ Anti-Dry-Fire system which prevents the crossbow from firing if triggered without an arrow loaded and also allows for easy de-cocking. And, Matrix 380 Blackout is outfitted with a Tact-Zone Scope (with 30 mm rings), a cheekpiece, R.E.D.S. suppressors, a four-arrow quiver (with bracket), four Diablo arrows, four 150 grain field points and a rope cocking aid.

260 lb. 380 FPS⁺
13.12" Power Stroke

#3900 Matrix 380 Blackout Tact-Zone "LITE-STUFF" package

Velocity @ 350 Grain – 380 FPS⁺ | Draw Weight – 260 lbs
Power Stroke – 13.12" | Mass Weight – 5.9 lbs | Overall Length – 35.62"
Arrow Length – 18" | Arrow Weight – 350 Grain Min. | Finish – Black Carbon
Stock Style – Ergo-Grip | Brace Height – .5" | Width "Un-cocked" – 30.62"
Width "Cocked" – 25.75" | Efficiency – 76.40% | String – BCY Dyna-Flight 97

THE **MATRIX 355** GIVES YOU EXCEPTIONAL SPEED AND ALL OF THE ADVANTAGES OF EXCALIBUR'S NEW COMPACT RECURVE TECHNOLOGY!

Compact Recurve Technology

PowerLoad limbs

Quad-Loc riser

Ergo-Grip stock

Matrix string

Tact-Zone scope (with 30 mm rings)

Four-arrow quiver (with bracket)

Four Diablo arrows (with 150 grain field points)

Rope cocking aid

New!

MATRIX 355

If you want all of the advantages of Compact Recurve Technology (compact platform, unmatched durability, lighter weight, enhanced accuracy, improved balance, reduced recoil/noise and easier cocking) and are willing to sacrifice just a little speed (355 fps is still extremely fast) and a few features, the Matrix 355 is for you.

You get Matrix' PowerLoad limbs, Ergo-Grip stock, Quad-Loc riser and the "Kolorfusion" applied Realtree Xtra® camo, plus a Tact-Zone scope (with 30 mm rings), a four-arrow quiver (with bracket), four Diablo arrows, four 150 grain field points and a rope cocking aid.

#3500 Matrix 355 Tact-Zone "LITE-STUFF" package

240 lb. 355 FPS⁺
12.25" Power Stroke

Velocity @ 350 Grain – 355 FPS⁺ | Draw Weight – 240 lbs
Power Stroke – 12.25" | Mass Weight – 5.4 lbs | Overall Length – 34.75"
Arrow Length – 18" | Arrow Weight – 350 Grain Min. | Finish – Realtree Xtra®
Stock Style – Ergo-Grip | Brace Height – .5" | Width "Un-cocked" – 30.62"
Width "Cocked" – 26.31" | Efficiency – 75.80% | String – BCY Dyna-Flight 97

Recurve-Limbed Crossbows are more reliable, more accurate, more

The mechanical advantage (let-off) of compound wheel technology makes sense for vertical bows where the archer enjoys

"Excalibur crossbows have the pulse of the arrow embedded within their design. With all of the Excalibur crossbows and their steadfast accuracy, all you ever need is one arrow".

— Alan Probst

RECURVE LIMBS

The "mechanical advantage" of recurve limbs.

Let-off, the mechanical advantage afforded by compound technology, is important to "vertical" bows where the archer must physically hold the bowstring while shooting. With crossbows, because there is no such holding, this mechanical advantage becomes a mechanical disadvantage. The "wheels" represent only more parts to break or things to go wrong without offering any substantive function. In fact, it's just the opposite, the time-tested and proven recurve limbs on an **Excalibur** crossbow offer numerous advantages over wheeled counterparts.

RELIABILITY

Those who shoot crossbows for a living, choose Excalibur and recurve limbs for their reliability and durability.

If you want to know how a product performs over the long haul, ask those who use it in the most grueling situations. In the case of crossbows, ask killer whale researcher, John Durban, who uses a crossbow day after day to tag killer whales...

"Excalibur has proven reliable for deploying satellite tags on whales, even in the most extreme environments."

*John Durban, Ph.D. – whale research scientist
Photo taken under permit authorization #14097
from the "National Marine Fisheries Service"*

"No animal is safe when an Excalibur is in my hands. This wild hog was shot using a 150 grain Boltcutter and only ran 30 yards. Thanks Excalibur!"

Corey Grossman – Innerloc's Out-There TV

"Powerful, fast, reliable and deadly accurate. Excalibur crossbows have it all so I can put the big ones on the ground."

*David Bloch – President & Founder
Outdoor Edge Cutlery Corp.*

powerful, lighter weight, faster and virtually maintenance free!

lower holding weight. **But**, for crossbows, where holding weight is not a factor, wheels become a mechanical disadvantage.

ACCURACY

Three times more wins than all other brands combined.

Crossbow competitions are a big deal in Europe. They shoot for accuracy. In the last 20 major events, **Excalibur** has won 15. That's three times more wins than all other crossbow brands combined. Why? It's the recurve limbs. The wheels on other crossbows create synchronization issues. Issues that even elite shooters obviously can't overcome. And issues that are known to get worse over time. So, don't take a chance. Choose the technology that the best shooters in the world have proven to be the most accurate. That's **Excalibur's** recurve limbs!!

LIGHTWEIGHT DESIGN

Fewer parts and streamlined design mean less weight to carry through the woods.

Yet another advantage of **Excalibur's** recurve limb design is less weight. With fewer parts and a sleek, streamlined design, you'll find an **Excalibur** crossbow to be a pleasure to hunt with, because it's simply more manageable without compromising anything when it comes to performance. This is especially true of **Excalibur's** new Matrix Series!

LOW MAINTENANCE

Change out a string in just 18 seconds – without a bow press!

Hopefully you'll never accidentally slice a string in the field. But, if you do, replacing that string on an **Excalibur** will be simple, even in the field without a bow press. In fact, we've timed experienced hunters making a string change and it takes them as little as 18 seconds. Contrast this to changing the string on a wheeled crossbow, which can't be done in the field as it requires a bow press. That means a trip to the archery shop, and it means that your hunt will be interrupted or possibly even over.

DURABILITY

Excalibur's recurve-limb design is far more durable than the competition.

You wouldn't buy a rifle, a shotgun or even a vertical bow that failed after a few hundred shots. Truth be told, numerous crossbow manufacturers sell crossbows that routinely fail after that many (or sometimes fewer) shots. **Excalibur's** recurve limb-design eliminates this issue and gives you a weapon that will last a lifetime. In fact, the new Matrix Series has dramatically increased the already amazing durability advantage of an **Excalibur** crossbow!

POWER

Excalibur Recurve-Limbed Crossbows have the power to take the biggest game!

There is a misnomer that recurve crossbows lack the power to hunt the biggest big game. While we suspect this myth comes from equating recurve crossbows to recurve vertical bows, the fact is, **Excalibur** recurve crossbows are as, or more powerful than wheeled crossbows. Just ask those who hunt the biggest big game!

PATENTED TRIGGER

The most copied trigger system on the planet.

Three decades ago, **Excalibur** founder, Bill Troubridge, set out to create a simple, reliable crossbow trigger with a crisp release that would assure pinpoint accuracy. All working components were machined from solid steel for a lifetime of performance. All working surfaces were turned, polished, assembled and tested in **Excalibur's** North American factory. Today while other components have undergone multiple improvements, the common-sense design of the **Excalibur** trigger stands unchanged as the gold standard in crossbow triggers.

SPEED

The new Excalibur Matrix 380 generates an amazing 380 fps!

Excalibur's crossbows have always been fast. Faster, in fact, than most compound crossbows. The new **Excalibur** Matrix is even faster – 380 fps! This, with less weight, greater accuracy and superior reliability!

DETAILS

Attention to detail, right down to the camouflage on the crossbow.

There is even more to an **Excalibur** crossbow. The stock on an **Excalibur** crossbow is made of a space-age composite material that is not only remarkably rugged but lightweight and comfortable and warm to hold. Precision computer-controlled machining ensures that an **Excalibur** mainframe holds the trigger and limbs in perfect alignment which is imperative for accuracy. The Realtree® camouflage on an **Excalibur** crossbow is applied via the "Kolorfusion" process which assures extreme and realistic detail. The bottom line: **Excalibur** is an exceptional piece of high-performance equipment that is guaranteed to put an arrow where you aim!

LIFETIME GUARANTEE

Outshoot, Outlast, Outperform

If your Excalibur Crossbow ever fails in the normal course of shooting, we will repair or replace it, free of charge!

www.excaliburcrossbow.com

"I need quality equipment that works every time, in the worst conditions imaginable, that is why I shoot Excalibur. They are simple to use and will never let you down!"

Dick Scorzafava – The Radical Hunter

"... my first ever harvest with a crossbow. I was very impressed with the speed and accuracy of Excalibur."

Jolynn Geer – Co-Producer
OutdoorEdge's Love of the Hunt TV Show

"I demand a lot from my equipment. When I step in the woods I expect my equipment to be at it's peak. My Excalibur Crossbow exceeds my expectations every time."

Dan Wallace – Excalibur's Huntin' the Backwoods

"Excalibur Crossbows are just plain tough. No matter what conditions I find myself in I know I can count on the rugged dependability only Excalibur can offer."

Karl Metzler – Excalibur's Huntin' the Backwoods

"I need durable equipment when I'm in the field... that's why I choose Excalibur. It's simple, accurate and most of all tough and durable!"

**EASY TO COCK AND STEADY
TO HOLD. EQUINOX COMBINES
OUTSTANDING POWER AND
IMPRESSIVE SPEEDS**

Equinox

Excalibur's 225 lb. Equinox combines outstanding power and impressive speeds of up to 350 FPS* with our handsome and ergonomic thumbhole stock. The Equinox is designed and built with a reduced overall length, making it easier to cock and steadier to hold without sacrificing the amazing downrange performance that has made Excalibur famous. The Equinox comes fully decorated with Realtree AP® camouflage using the striking "Kolorfusion" process, and it includes our comfortable ambidextrous cheekpiece. This is a crossbow that will earn its place in your trophy room for decades to come. Each Equinox comes tapped to accept Excalibur's scope and quiver mounts.

**VORTEX GIVES YOU A SUPERB
COMBINATION OF A SMART DESIGN
IN A SMALLER PACKAGE!**

Vortex

Shooting up to 330 FPS*, the 200 lb. Vortex gives you smart design and enviable performance all in a smaller package. Utilizing our comfortable and stable thumbhole stock, it has ample power for the largest game, its accuracy is legendary, and it's rugged enough to tackle your toughest hunts without ever letting you down. Vortex is drilled and tapped to accept Excalibur's scope and quiver mounts. If you are a hunter who appreciates searing speeds and flat trajectories in a smaller package, the Vortex is the crossbow for you!

"After purchasing an Excalibur, I am well pleased. Very, very accurate, even after dropping it 15 feet from my treestand. There was no damage and it still shot dead on. I am very happy with it and wish I had bought one sooner!"

– Brian Miller

Carbon Fiber Finish – ideal for blinds!

#6733
Ibex SMF Kit

175 lb. 305 FPS*
14.5" Power Stroke

#6733 Ibex SMF Crossbow Kit

THE **IBEX SMF** IS SMALL IN STATURE BUT BIG ON PERFORMANCE. IT'S SMOOTH, SILENT AND DEADLY.

IBEX SMF

Excalibur's Ibex SMF crossbow combines our ergonomic thumbhole stock with our precision 175 lb. fiber-reinforced composite "SMF" shooting platform to create an amazingly compact hunting crossbow with power to spare! Smooth and silent, but oh so deadly, the **Ibex SMF** will churn a 350 grain arrow out at over 305* FPS, and its bulletproof design guarantees trouble-free service and pinpoint accuracy at a great price.

Combine this performance with the **Ibex SMF's** compact frame and light weight and you've got a crossbow that will comfortably fill your freezer for years to come without the stress and strain of ultra high draw weight or extremely long string travel. The **Ibex SMF** comes exclusively as a kit which includes a matching multiplex crossbow scope and mounting hardware, a quiver and mounting bracket plus four arrows and field points and our rope cocking aid.

Velocity @ 350 Grain – 305 FPS* | Draw Weight – 175 lbs | Power Stroke – 14.5" | Mass Weight – 5.9 lbs | Overall Length – 36.4"

Arrow Length – 20" | Arrow Weight – 350 Grain Min. | Finish – Realtree AP® | Stock Style – Thumbhole

Comes in kit with scope, quiver, arrows, field points and cocking aid

EXOMAX WITH A 225 LB. DRAW WEIGHT AND CAPABLE OF ARROW SPEEDS OF 350 FPS* IS ONE EXCEPTIONALLY FAST HUNTING CROSSBOW!

#6760
Vari-Zone
Package

Excalibur's Exomax boasts a 225 lb. draw weight and is capable of arrow speeds of 350 FPS.* Excalibur's proven recurve-limb design accomplishes this amazing speed and power without sacrificing any of the reliability and accuracy that Excalibur crossbows are famous for. The Exomax features a traditional stock and comes finished front to back in Realtree Hardwoods HD® using the "Kolorfusion" process for the most detailed and realistic camo finish ever, and includes our comfortable ambidextrous cheekpiece. It is also drilled and tapped to accept our optional scope and quiver mounts.

EXCALIBUR CROSSBOW Accessories

C2 Crank Cocking Aid

Excalibur's C2 Crank Cocking Aid is the perfect solution for hunters who have difficulty drawing high poundage crossbows. The **C2 Crank** dramatically reduces the effort required to draw any of **Excalibur's** models, as well as guaranteeing consistent string alignment. Unlike cumbersome, permanently mounted cranks, it detaches in seconds when the bow is cocked, and is carried separately in a pack or pocket. Constructed of high-strength aluminum alloys to reduce weight and machined to tightest tolerances, it will provide years of trouble-free service.

#2199

Rope Cocking Aid

Our **Rope Cocking Aid** will allow you to comfortably load and unload** any **Excalibur** crossbow by reducing the felt draw weight by 50% and also will guarantee perfect string alignment for optimum accuracy. Made from highest quality components, it uses comfortable "T" handles and easily slips into a pocket when not in use.

#2195 #2195A (Assembled)

** (refer to our Instructional DVD and website video clips for full instructions)

WHICH COCKING AID IS RIGHT FOR YOU?

While cocking aids are often not essential to cock your crossbow, we strongly recommend that you use our rope cocker regardless of whether you can cock your crossbow without it. Using the rope cocker guarantees precise centering of the crossbow's string and, therefore, accuracy is much better than the "Armstrong" method will allow. Rope cockers are generally enough for hunters with minor to moderate shoulder or back problems or strength issues, but the final determination regarding your ability to cock your crossbow using one is up to you and your doctor. If you need more help to cock your crossbow, then it's time to consider a crank. It will reduce total effort dramatically and allow almost anyone to cock and use our crossbows in comfort, but remember that crank devices are much slower to use, bulkier, noisier, and more expensive than rope cockers are. Only choose that option if you honestly require it and enjoy your crossbow hunting! Remember, always engage your safety after you're done cocking your crossbow.

Multi Red-Dot Sight

Our **Multi Red-Dot** sight uses reflex technology to create a lighted electronic sighting system that is compact and lightweight, but provides you with four sighting dots to compensate for arrow trajectory from 20 to 50 yards. With the flick of a switch the spacing of this sight's compensation dots can be varied to precisely allow for the arrow's drop at velocities from 300 to 400 FPS. The **Multi Red-Dot** sight features a dual red or green color lighting system to allow you to switch quickly to the color or sighting dots that best match your eyesight and background.

#1960

#1964

New! Tact-Zone Scope

Ultra-compact **Tact-Zone** scope is the ideal match and comes as standard equipment on **Excalibur's** compact Matrix Series crossbow's. The **Tact-Zone** scope is loaded with features including a new updated reticle design, a 30mm tube, red/green rheostat illumination and a multi-coated lens for exceptional clarity! The new **Tact-Zone** scope is adjustable for speeds between 275 fps and 410 fps and features half-inch click adjustments at 20 yards for easy sighting in. **Tact-Zone** scopes are also sold separately and, due to the speed adjustment dial, are the perfect upgrade scope for any crossbow.

#1964

#1982

Vari-Zone Multiplex Scope

The **Vari-Zone** multiplex crossbow scope allows you to precisely compensate for the trajectory of any crossbow shooting between 250 and 350 FPS for up to 50 yards in EXACTLY 10-yard increments. Simply sight for 20 yards on the crosshair, dial in your crossbow's velocity, and you are automatically sighted for 30, 40, and 50 yards! This gives you the opportunity to change arrows without having to relearn the trajectory scale or else to perfectly tune your scope to any crossbow. The **Vari-Zone** is virtually parallax free at normal crossbow shooting ranges and has sensible adjustment clicks of 1/2" at 20 yards.

#1982

#1961

Shadow-Zone Illuminated Scope

Based on **Excalibur's** famous **Vari-Zone** crossbow scope, the **Shadow-Zone** is made with today's avid crossbow hunter in mind. The **Shadow-Zone** has the same basic design features as our famous **Vari-Zone PLUS** a dual red/green color illuminated multiplex reticle, making it a must for hunting in the low light conditions. Like the **Vari-Zone**, the **Shadow-Zone** features **Excalibur's** adjustable multiplex crosshair system that makes it possible to adjust crosshair spacing for precisely 10-yard increments to match the exact trajectory of your crossbow at velocities between 250 and 350 FPS.

#1961

#1962

Twilight DLX Illuminated Multiplex Scope

If you are a crossbow hunter who truly takes his sport seriously, this is the only scope that will satisfy you! The **Twilight DLX** is designed to make the most out of every bit of light to give you the brightest image possible in extreme low light hunting situations. That means clearer, crisper view for absolute target identification and precise shot placement after sunset and before sunrise when the big ones are most likely to be encountered. The **Twilight DLX** features a huge 44mm objective lens to gather the most light possible, a 30mm tube for unimpeded light transmission, and fully multi-coated lenses throughout to maximize clarity and brightness. The **Twilight DLX** comes with our famous adjustable multiplex crosshair system for accurate compensation for trajectory in precise 10-yard increments at any speed between 300 and 400 FPS, and our dual red or green color illuminated reticle to assist you in low light accuracy.

#1962

EXCALIBUR CROSSBOW Accessories

New! Guardian™ Anti-Dry-Fire System

The **Guardian™ Anti-Dry-Fire** system prevents dry firing and allows easy de-cocking. In the event the crossbow is fired without an arrow, the Guardian system, a self-contained unit housed inside the crossbow's scope mount, catches the string preventing the crossbow from dry firing, thereby preventing possible damage. It also features a built-in release so, at the end of your hunt, unlike with the other anti dry fire systems, you can easily de-cock your crossbow without having to fire an arrow, a major advantage. The Guardian system is standard on **Excalibur** Matrix 380 models and is available as an aftermarket part for all other **Excalibur** crossbow models.

#7016

Scope Rings

Excalibur's 1" and 30mm **Scope Rings** are made from tough, lightweight aluminum and are anodized to a flat, non-reflective finish. They are strong enough to withstand the heaviest recoil without moving or changing point of impact.

#2007 1" scope rings

#1967 30mm scope rings

Scope Cover

Don't give your location away by allowing game to see light reflecting from your scope. Our camouflage **Scope Cover** slips over your scope and Velcro's into position in seconds!

#2008

Scope Mount

Our **Scope Mount** is built from strong anodized aluminum to solidly and securely position your scope for accurate shooting. Using a weaver type base, it installs in seconds using 4 pre-tapped mounting holes located on every trigger unit.

#2006

New!

Cross-Pod Bipod

Make sure of your shot with a **Cross-Pod Bipod**, the quick-detach bipod from **Excalibur** that attaches to your **Excalibur** crossbow (or any crossbow/firearm with a Picatinny rail). The legs on the **Cross-Pod** adjust from 8" to 10" and collapse out of the way quickly and easily when not in use. Made of aluminum and steel, the **Cross-Pod** is lightweight yet durable and is fitted with rubber feet for no-slip stability. **Cross-Pod** eliminates the need for a benchrest and mounts to your **Excalibur** crossbow.

Must purchase #7015 Tac-Pac Kit to attach Cross-Pod to your Excalibur.

#7011

Quiver Bracket

Made from strong composites, our **Quiver Bracket** allows you to use most detachable broadhead quivers to safely carry your hunting arrows ready for use. Reversible for left hand.

#2004

Range Finder Mount

Our **Range Finder Mount** suddenly makes your range finder an indispensable part of your crossbow hunting kit. It holds your range finder to the scope where it can be easily accessed for split-second confirmation of your target range before firing. The mount features a Sorbothane shock reduction system to protect your range finder upon firing and can be easily removed when not required. It will accommodate both vertical or horizontal range finders. For use **ONLY** with crossbows and rimfire rifles. Designed for scopes with a 1" tube.

#1975

TAC-PAC Kit

Tactical package attaches to your crossbow using the quiver mounting holes and allows you to quickly and easily add any of the multitude of items available for a Weaver 7/8" mount. This kit includes a three-rail mounting base, plus a reversible quiver mounting bracket and a removable multi-position hand grip, that provides a safe and convenient alternative to **Excalibur's** existing fore-end grip and will work with any of **Excalibur's** models (except the Vixen II).

#7015

Diablo 18" Carbon Arrows

Excalibur has teamed with arrow manufacturer, Easton®, to develop the new

Diablo Carbon Arrows, specifically designed for use in Excalibur's Matrix Series crossbows. 18" long and featuring 2" vanes, they are spined for the blistering speeds you get with Excalibur's Matrix crossbows. A heavier front insert increases front-of-center weight for unparalleled accuracy. **Diablo Carbon Arrows** also feature a flatback insert which means no need for nocks, which gives you much more reliable contact with the string. Available in 6-packs or with the amazing illuminated Lumenok's (shown) in 3-packs.

#22DV18IL-3 (3-Pack with Lumenok Illuminated Inserts)

#22DV18-6 (6-Pack)

Illuminated Diablo carbon arrows shown

New!

Arrow Puller

Designed to stop damage to arrows, feathers, and patience when target shooting, our **Arrow Puller** screws into the back of our arrows to help you to remove them easily. A very handy and useful item!

#1986

Quick Detachable Quiver Mount

Our removable quiver bracket goes on and off in a flash, leaving your crossbow free of obstruction when the quiver is not required or when it is being encased for transport. It is black anodized for durability and features a brass locking screw.

#1979

Quiver

Excalibur's broadhead **Quiver** is designed to safely hold your arrows and broadheads, but with a quick twist of a locking screw it can be removed from your crossbow for maximum mobility while hunting. This four-arrow quiver features two tough arrow clips specially designed to securely hold arrows tipped with either mechanical or fixed blade broadheads, and a durable camouflaged hood to protect you from razor sharp blades.

#2029H Realtree Hardwoods HD®

#2029A Realtree AP®

#2029X Realtree Xtra®

FireBolt 20" Carbon Arrows

Excalibur's exclusive **FireBolt Carbon Arrows**

are designed specifically to deliver optimum speed and accuracy with high performance recurve crossbows when using broadheads. Developed in cooperation with Easton®, **FireBolt Carbon Arrows** feature a flatback (no nock) insert for more more reliable string contact, reinforced spines and 4" vanes. Available in 6-packs or with the amazing illuminated Lumenok's in 3-packs.

#22CAVIL-3 (3-Pack with Lumenok Illuminated Inserts)

#22CAV-6 (6-Pack)

Also available in Easton® XX75 aluminum camo shafts, #2213, #2216 & #2219 sizes

Boltcutter Broadhead

This 150 grain, 1-1/16" broadhead has proven itself to be the most accurate hunting head on today's high speed hunting crossbows, delivering amazing accuracy even at extreme range when teamed with an appropriately designed arrow. The **Boltcutter** is made entirely from high strength stainless steel to withstand the hardest hit and still deliver devastating terminal performance.

#6670 (3-Pack), #6674 (6-Pack), #6671 (Boltcutter replacement blades/18-Pack)

#TP150-12 (150gr field points)

New! Boltcutter B.A.T. Broadheads

Excalibur's **Boltcutter B.A.T. (Blade Alignment Technology) Broadheads** are tune-able, allowing you to align the blades so each broadhead flies identically. The key is that the blades on each individual broadhead are aligned the same way when loaded in your crossbow. **Boltcutter B.A.T. Broadheads** allow you to do just this with a simple wrench and hex key. Once aligned, your groups will be dramatically tighter! **Boltcutter B.A.T. Broadheads** are made of high strength stainless steel and, the proven 150 grain heads (with 1-1/16" cutting diameter) increase front of center weight for pinpoint accuracy when shot out of today's high performance crossbows.

#6673 (3-Pack)

X-Act Mechanical Broadhead

This 100 grain, 1-7/16" cut broadhead is designed for the hunter who wants maximum velocity from their crossbow but refuses to accept less than outstanding accuracy. The **X-Act** broadhead's "Clip Loc" blade control system holds blades securely during a crossbow's explosive acceleration eliminating the need for "O-rings" or rubber bands, but deploying the blades reliably on impact.

#6672 (3-Pack), #770-9 (X-Act replacement blades/9-Pack), #TP100-12 (100gr field points)

New!

Lens Mate Cleaning System

Ideal for scopes, binoculars, rangefinders, etc., **Lens Mate Cleaning System** eliminates the leaking, spilling and drying out you get with liquid lens cleaners. With cleaning compound applied, the soft, dry pad quickly and effectively cleans the lenses on all of your optics. A retractable brush lets you remove dust and particles. A rubberized coating gives you a secure grip. Compact for easy transport.

#1963

Serving Wax

Our **Serving Wax** will dramatically increase string life by reducing the friction created when firing your crossbow. Comes in a handy resealable container.

#2009

Ex-Lube / Ex-Oil

Ex-Lube is designed to extend the life of your string's serving and maximize the speed of your crossbow by reducing friction. Odor-free, non-toxic lubricant continues to work in even the coldest hunting conditions. Scent-free **Ex-Oil** is a superior, all-purpose lubricant that will keep your bow and its trigger mechanism functioning flawlessly. The convenient container allows for precise placement into your trigger's working parts.

#7005 (Ex-Lube) **#7010** (Ex-Oil)

S5 String Shock Sound Suppression System

This exciting accessory uses a combination of modern vibration reduction technology and commonsense thinking to produce the most durable and effective shock and sound reduction possible. The "S5" string shock and sound suppression system attaches easily and quickly to mounting holes in the riser of all 2004 or newer **Excalibur** crossbows and will work either in conjunction with **Excalibur's** dissipator bar system or on its own to quiet shot noise and reduce vibration.

#1966

#1968 S5 and Matrix R.E.D.S. Replacement Pads

Cheekpiece

Excalibur's **Cheekpiece** will attach to any of our thumbhole stocks and our new traditional stock* to maximize comfort and control on your crossbow, and it looks great too! Finished in either Realtree Hardwoods HD®, Realtree AP®, or Realtree Xtra®, the cheekpiece seamlessly snaps in place for either right- or left-handed shooters and is attached using a single machine screw.

#1977 Realtree® Hardwoods HD®

#1978 Realtree® AP® HD®

#1976 Realtree® Xtra®

*Our new traditional stocks are identified by the five diagonal slash marks located on the fore-end on either side of the trigger.

Padded Crossbow Sling

Excalibur's **Padded Crossbow Sling** makes carrying your crossbow to and from your stand a pleasure. Finished with tough camo fabric and nylon straps, each sling comes with permanently mounted quick detach swivels.

#2042

Dissipator Bar

Our **Dissipator Bar** uses an ultra modern energy absorbing compound to tame recoil energy and noise on any **Excalibur** crossbow except Matrix Series crossbows. This lightweight accessory reduces noise by as much as eight decibels but does not reduce arrow velocity in any way! A **Dissipator Bar** kit comes with bars, pads, and mounting accessories to tame one crossbow and installs in minutes.

#1990

#1991 (Replacement pads are available separately)

Crossbow Stringing Aid

Changing strings on your **Excalibur** crossbow is fast and easy when you use our **Crossbow Stringing Aid**. It really takes the sweat out of stringing, unstringing, or changing strings!

#2096

New!

Matrix R.E.D.S. (Recoil Energy Dissipation System)

Matrix R.E.D.S. dampeners come as a pair and are strategically positioned on the crossbows where they bear the brunt of the strings follow through which allows them to substantially reduce shock, vibration and noise. Suppression pads are removable and allow you to rotate or reposition, ensuring longer pad life.

For Matrix Series crossbows only.

#7006

New!

Matrix Crossbow String

Constructed of BCY Dynaflight 97 material **Excalibur's Matrix Crossbow String** produces two distinct advantages. First, it increases speed, which is a key attribute of Matrix Series crossbows. The Matrix 380 Xtra, for example, shoots 380 fps! The second advantage is reduced creep which allows you more time shooting, less time tuning. The **Excalibur** Matrix string also features a new proprietary center serving which will give you increased string life.

For Matrix Series crossbows only.

#1992

Flemish Dynaflight Crossbow String

Flemish Dynaflight Crossbow String combines modern materials with traditional time-proven design for the utmost in performance and durability. For use on all **Excalibur** crossbows except for the Matrix Series crossbows.

#1989

Excel Crossbow String

Excel Crossbow String is machine made to achieve high arrow velocities with maximum reliability. This string comes standard with all of our models. For use on all **Excalibur** crossbows except for the Matrix Series crossbows.

#1994

New! EX-PACK Crossbow Pack

EX-PACK Crossbow Pack from **Excalibur** conveniently and securely holds your crossbow yet offers you almost instant access to it (just disengage the quick release strap) without you having to first remove the pack. The stock holder on the **EX-PACK** is adjustable and a center channel adjustable strap allows you to position the crossbow to your liking. And, it has a quick-detach quiver holder as well. **EX-PACK** is made of an ultra-quiet Polarfleece micro-Tricot fabric (in True Timber XD-3 camo), and a thermo-plastic polyurethane lamination offering weather and abrasion protection without sacrificing pliability. Includes six heavy-duty zippered pockets as part of 900 cubic inches of storage. Vented backing and breathable nylon mesh provide airflow to keep your back dry. Fully adjustable, heavy-duty padded shoulder straps are attached to pivots allowing freedom of movement from the crossbow. An adjustable padded waist belt includes lumbar support and transfers pack weight to your hips. **EX-PACK** is made to last. All components are premium. The buckles and zippers are heavy duty and the straps feature crossbar stitching and double tacking for superior strength and durability.

#6007

New!

Excalibur Hunting Knife

The new **Excalibur** fixed blade hunting knife is a perfect combination between style and performance. The 3 inch long and 1 1/8 inch wide blade is made from 420 HC steel and specifically designed for field dressing and skinning. The ergonomical and ease of use designed Oak Diamond wood handle proudly displays the **Excalibur** crossbow logo. The knife comes securely protected in a form fitted rugged black cow hide sheath.

#7014

Crossbow Stand

Excalibur's Crossbow Stand

is the perfect way to safely display and store your crossbows either at home, or on the range. Made from black powder-coated tubular steel they are lightweight and inexpensive, folding flat for ease of transport.

#2180

Unlined Crossbow Case

Made with durable camouflage fabric, our **Unlined Crossbow Case** will protect your bow and conform to state or provincial game laws. Durable carrying straps make it easy to maneuver on your way to your stand.

#2012

Deluxe T-Form Padded Crossbow Case

Our Semi-Rigid **Deluxe T-Form Padded Crossbow Case** is designed as an inexpensive, lightweight, and portable option to bulky solid cases. It will securely hold and protect your **Excalibur** crossbow in its foam-lined interior and has handy pockets to hold a full quiver and accessories.

#6008

Accessory Packages: *Excalibur* crossbows are available with or without accessory packages as noted above. There are three different "LITE STUFF" (**LS**) packages that feature alternative scopes (see below) along with scope mounts/rings, 4 carbon arrows/field points, an *Excalibur* 4-arrow quiver with mount and a rope cocking aid. Many *Excalibur* models are also available crossbow only (**CO**).

- "LITE STUFF" Tact-Zone (**TZ**) – features the Tact-Zone scope with new updated reticle design, a 30mm tube, red/green rheostat, illumination and a multicoated lens for exceptional clarity (see pg. 15).
- "LITE STUFF" Vari-Zone (**VZ**) – features the Vari-Zone Multiplex scope which allows you to precisely compensate for varying trajectories depending on arrow speed (see pg. 15).
- "LITE STUFF" Shadow-Zone (**SZ**) – features the Shadow-Zone Illuminated Scope which has same features as Vari-Zone plus a red/green illuminated multiplex reticle (see pg. 15).

The **Eclipse XT**, **Ibex SMF** and **Axiom SMF** come exclusively in kit (**KIT**) form which includes a scope, mounts, rings, 4 FireBolt arrows/field points, quiver (with mount) and rope cocking aid.
